Beautiful and Intelligent

Hacel luminaires are not just beautifully designed they are also technically advanced. A comprehensive range of Integrated LED Luminaires feature the Hacel designed LED Light Engine utilising Cree XPG Lighting Class LED Semiconductors. Engineered and manufactured within the Cree test configuration guidelines to ensure lumen performance, thermal management and longevity is maintained. LED luminaires are available in a choice of Warm, Neutral and Cool White colour temperatures with outputs of up to 2500 lumens. Further significant advantages include 50,000 hour life expectancy, reduced energy consumption, efficacies up to 86 lm/W and dimming versions.

It is the desire to be different that distinguishes Hacel

Innovative and exciting LED lighting

Designed and manufactured in the UK by Hacel
